## SOUTH QUINCY HAS GOOD ORE

Another Park City Youngster Coming to the Front.

MAY DAY'S HOT MEETING

NEW YORK RECOVERS ORE ON THE 300 LEVEL.

Stockholders Succeed in Naming New
Directors After a Struggle.

When the special meeting of the shareholders of the May Day Mining company convened yesterday afternoon it was evident that a storm was brewling. After the committee on credentials submitted its report the storm burst and for a time the proceedings savored more of a hot political rumpus than a business meeting.

The opposition to Manager Snow and his adherents developed a world of strength, and immediately following the preliminary skirmish Temporary Chairman C. H. Wilcken was deposed and Attorney S. P. Armstrong was made permanent chairman of the gathering. When that had been done the Snow forces withdrew and the business for which the meeting was called was proceeded with the meeting was called was proceeding to the meeting of the storm was there is no doubt that he and his friends will have a good thing there one of these days.

BACK FROM ARIZONA.

Fred C. Dern Tells of the Property of the Imperial Copper company at Red Rock, Ariz., as assistant superintendence the meeting was called was proceeding with the meeting was called was proceeding to the meeting which was purchased last winter by the American Development company on the report of Percy Williams, who for which the meeting was called was proceeded with.

had received legal advice from high authority before proceeding, and they had no doubt that their action would stand.

FINE ORE ON THE 300.

New York Bonanza Again Opens Into Rich Rock on That Level.

A telephone message from the New York Bonanza company to the company's office in this city yesterday brought the information that the high-grade ore, which had previously given out on the 300-foot level had again been encountered. Superintendent Ferguson stated that it made its appearance on Friday night, and when he telephoned it was looking very promising, indeed. Manager Wilson, who has been under the weather for several days, sald he had not been able to get much in the way of particulars, because he was at home when the message came, but he stated that they had been expecting the ore to make its appearance for several days past, the constant improvement of conditions on that level fully warranting the expectation.

On the 400 level, it is said, conditions are now most favorable for the making of a big ore body there and development. Before going out to his bediens had not been able to get much in the way of particulars, because he was at home when the message came, but he larger timbers to enter into the structure, but it is though that they will reach the ground within a day or two and not materially interfere with the erection of the buildings.

during the past week. On Monday last the stock was a free offering at \$9 per share, with the talent pretty generally predicting that it would go down to \$6 or \$7 within a short time. Quite a little of the stock had been previously sold "short" down to \$5.50, and the purpose to depress it still further was not denled by some of the brokers. When the news of the great copper, silver and lead strike on the 1,400 level was released, a few hours later, the bear element hustled for cover and not a word has been heard from it since. From \$9 the stock began to move up, notch by notch until, at the close of yesterday's business, it was selling at \$1,50. Otherwise no startling changes have occurred in the market. Some of the active traders have advanced, so, generally speaking, the break has been an even one.

speaking, the break has been an even one.

During the week a total of 161.01 shares of stock, with a selling value of \$100,353.53, shanged hands, as against 221,561 shares and \$58,782.70 during the week before. Yesterday's single regular and open loard calls brought out 19,845 shares, which sold for \$20,477.20.

Consolidated Mercur, for some unactionable reason, has been very weak luring the last few days, but from the eports which come from the mines and mill of the company it would seem that he shares cannot long remain as low as they are at the present time. Carisa has shown little change during the week, but Century has jumped into favor and, from 50c it has been advanced to 57c in the bidding, while holders are lemanding 75c.

A little Daly has sold at \$2. Dely-

. a	snow forces withdrew and the business for which the meeting was called was proceeded with.  In person and by proxy 304,804 shares of stock out of the 400,000 in the corporation were represented, and 271,817 shares were held and voted by the opposition to the Snow forces, who made the contention in the beginning that		board calls brought out 19,845 shares, which sold for \$29,477.20.  Consolidated Mercur, for some unac-	Vests and Drawers Ladies'	gray or ecru, val

works as general manager.

The Heraid's Park City correspondent reports that on Friday some prospectors struck some phenomenally rich ore in Woodside canyon, below the Woodside mine. Some of the rock gave values as high as \$2.000 per too.

At the Alaska delinquent sale yesterday afternoon something average of the color of the co At the Alaska denament of the Alaska day afternoon something over the 400,000 shares of the corporation were bid in by the secretary of the company and converted into the treasury for the amount of the assessment (3c) and costs. James Long, ir., who has the contract for running the Annie Laurie company's long lower tunnel, came up from camp resterday morning. He says that everything is moving with clock-work precision at the mine and mill now and good results are following.

H. C. Brownlee of the St. Louis-Ontatio has returned from a business trip to
he company's headquarters at St. Louis,
le had nothing new to report concernug the company's affairs, but he said
he new compressor, which was ordered
few weeks ago, should be at the mine
by this time.

Manager M. M. Johnson returned from a trip to the Newhouse company's Cactus bonanza, in Beaver county, yesterday morning. He says that everything is running along smoothly, with nothing new to report. Pipe for the water line from Wah Wah is arriving daily and within a few days the construction of the line will be taken up again.

After pearly a month's views with procuthe line will be taken up again.

After nearly a month's siege with pneumonia and its attendant evits, Superintendent R. G. Legg of the Uncle Sam will seek recuperation in the balmy atmosphere of Georgia, leaving for that southern clime today. As soon as he gains sufficiently in strength he intends to make a study of the old gold mines and never prospects in that section before returning to Utah.

Reports from the Daly-Judge last evening were to the effect that the new strike is opening up better than the most optimistic of the property's friends have expected. It has been sunk on for a distance of fifteen foet or more and the

with no signs of when its lateral limits will be reached. Superintendent Dunyon promises to have 100 tons of it on the market within the next few days.

Notice. To the Stockholders California M. & M. Company:
There is a proposition pending to obviate any further assessments, that is of interest to every stockholder in the of interest to every stockholder in the California mine, and the management desiring to have the same sanctioned by every stockholder, requests them either to call in person or communicate by letter at once with the secretary of the company, at room No. 126 Keith-O'Brien building, Salt Lake City, Utah, when all matters will be the company of the com when all matters will be explained
